

Amendments to the Specification:

Please replace the Title of the Invention with the following Title:

-- CONTROL APPARATUS WHICH REMOTELY CONTROLS A
DEVICE IN A NETWORK SYSTEM AND CONTROL METHOD THEREFOR --

Please replace the paragraphs starting at page 2, line 2, and ending at page 2,
line 25, with the following rewritten paragraphs:

--The above-mentioned objects can be attained, according to a preferred
embodiment of the present invention, by a control apparatus ~~for remote-controlling~~
~~an AV~~ which remotely controls a device in a home network system, that comprises:
a remote controller for ~~remote~~ remotely controlling said control apparatus;
communication means for downloading a control program for ~~remote~~ remotely
controlling an unknown AV device; and control means for generating, according to
the downloaded control program, a graphical user interface for graphically
displaying functions assigned to ~~plural~~ a plurality of keys provided in said remote
controller.

According to another preferred embodiment of the present invention, there is
also provided a control method for a control apparatus ~~for remote-controlling an AV~~
which remotely controls a device connected to in a home network system, the
control apparatus ~~being provided with~~ and has a remote controller for ~~remote~~
remotely controlling said control apparatus, and the method comprises steps of:
downloading a control program for ~~remote~~ remotely controlling an unknown AV
device; and generating, according to the downloaded control program, a graphical

user interface for graphically displaying functions assigned to ~~plural~~ a plurality of keys provided in said remote controller.--.

Following line 25 of page 2, please add the following paragraph:

--According to a further preferred embodiment of the invention, there is provided a control apparatus which remotely controls a device in a network system, that comprises: a remote controller adapted to remotely control said control apparatus; a communication unit adapted to download a control program for remotely controlling an unknown device; and a control unit coupled to said communication unit, and adapted to generate, according to the downloaded control program, a graphical user interface for graphically displaying functions assigned to a plurality of keys provided in said remote controller. --.

Please replace the Abstract of the Disclosure with the rewritten Abstract of the Disclosure on the sheet attached hereto.
